

Developing Effective Community Truancy Boards (4-Part Workshop Series)

**Join us for this
4-part
Workshop
Series!**

Description:

This four-part workshop series will prepare district teams to implement effective Community Truancy Boards (CTBs), assuring compliance with HB 2449, and meeting requirements of the 2016-17 MOU for NCESD Truancy Intervention & Re-Engagement (TIRE) Services. CTBs are intended to reduce the number of truant students needing court interventions, returning them to school attendance sooner and more sustainably. Poor attendance is an early warning indicator of future drop-out and can be the first contact youth have with the court system. CTBs are considered effective interventions to removing barriers to attendance and to interrupting the school-to-prison pipeline effect. North Central ESD has formed this partnership with courts and districts because we recognize that working effectively together to maximize CTBs will strengthen student graduation rates and welfare in our communities.

Objectives:

Part 1

Purpose, mission, and vision of CTBs. Starting points for support. Identify protocols and coordination needed.

Part 2

Drafting your district's CTB structure, roles, referral process, interview agenda, and follow-up.

Part 3

Plan Spring 2016 CTB. Identify strategies for family engagement and motivation. Draft Court-District communication plan.

Part 4

Court-District MOU development. Tracking truancy in Skyward. Student screening tools and CTB evaluation. Action planning for continuous improvement.
